

Portable and Foldable Project any 3D Objects

HiCam is a portable visualizer and document camera that weights only 420g, which can capture and display any documents, 3D objects, or even use HiCam as a video camera to display live video to the audience.

- Foldable and portable design makes HiCam easy to carry and ready to use in a few seconds.
- On-screen-display HiCam button allows you to switch between slide show and HiCam camera freely.
- 3 million pixels color imagine sensor is ready for capturing high quality picture.
- Capture and create PowerPoint slides in a "what you see is what you get" style. Only by putting the documents or object under HiCam, open a PowerPoint file and then HiCam will automatically insert the pictures into slides.
- USB 2.0 connection provides high speed data transmission that minimize the respond time when HiCam capture the picture.
- Up to 5 times zoom in function that shows to the minimize detail of the picture clearly.
- Include software tools that let you use HiCam as a book scanner.

Why HiCam is Different

- ✓ HiCam weights only 0.9lb and it fits in your briefcase. HiCam is designed for business travelers and presenters who need high mobility. HiCam comes with special design software applications that will fulfill the requirements of above users.
- ✓ Save your time by conveniently converting your documents or objects into PowerPoint slide show.
- ✓ You can show your audience any document or 3D object during the PowerPoint presentation. Just place the items under the HiCam and click on HiCam's on screen button. Then you can switch between PowerPoint slides and HiCam seamlessly!
- ✓ HiCam provides annotation tool that let you draw, mark and write on the captured image during your presentation. Make your presentation more clearly and attractive!
- ✓ The only document camera provides the "Scan" software that let you use HiCam to scan sales orders, customer contracts, etc. and send them out by e-mail.
